

FACTORY CAT

MINIMAG

PROUDLY BUILT IN THE USA

FAMILY OF INDUSTRIAL CLEANING EQUIPMENT (21" - 55")

EASY TANK CLEAN UP

Factory Cat equipment has a reputation for durability and unmatched cleaning performance. The new **MiniMAG** combines our proven cleaning ability with improved agility and operator productivity.

Factory Cats thrive in metal fabrication facilities, car dealerships, machine shops, food / beverage packaging and distribution, or in any application where customers demand much of their investments.

The **MiniMAG** is available with a large battery package and 17-gallon tanks, which reduce costly down time. There are multiple scrub paths available to better match your needs, in both disk and cylindrical styles.

The **"Disk"** machines offer nearly 35% more power than other machines. The deck is protected by steel guards and large polyurethane rollers keep the unit from marking walls. Brushes are driven by powerful motors, and are gimbal-mounted, to improve cleaning on uneven floors.

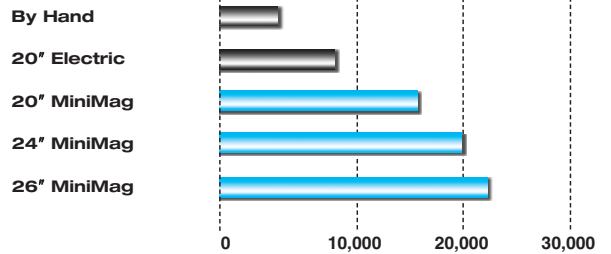

The **"Cylindrical"** machines have the added benefit of sweeping up debris while scrubbing. This may eliminate the need to presweep an area, increasing productivity.

Brush pressure is automatically maintained at one of five settings, on traction units, while the LCD provides diagnostics and hour meters, covering **"transport"**, **"scrubbing"**, **"vacuum"** and **"key-on"**. The LCD also gives the operator a real-time view of systems running, battery level and scrubbing pressure. If the batteries become discharged, the unit automatically shuts down systems to allow it to return to the charge station.

The heavy steel construction, oversized motors, extra thick polyurethane tanks and stainless steel fasteners provide a solid foundation. The **MiniMAG** has a powerful, sealed transaxle for climbing steep ramps and the four point stance allow it to remain stable over rough terrain.

While offering the toughness you are looking for, your operators will find the **MiniMAG** easy to maneuver into tight areas, and simple to service.
